# ED-613

M.A./M.Sc. 3rd Semester
Examination, March-April 2021

## MATHEMATICS

Paper - II

Partial Differential Equations and Mechanics - I

*Time* : Three Hours]    [*Maximum Marks* : 80

**Note** : Answer any **two** parts from each question. All questions carry equal marks.

### Unit-I

1. (*a*) State and prove the symmetry of Green's function.

   (*b*) State and prove the Poisson formula for half-space.

   (*c*) State and prove the mean value formula for Laplace equation.

---

**DRG_67_(3)**                              *(Turn Over)*

## ( 2 )

### Unit-II

2. (*a*) Derive the fundamental solution for heat equation.

   (*b*) Obtain the solution for $n = 2$ of wave equation by spherical means.

   (*c*) State and prove the Euler's-Poisson-Darboux equation for wave equation.

### Unit-III

3. (*a*) Derive Kinetic energy in terms of generalized co-ordinates.

   (*b*) State and prove the Donkin's theorem.

   (*c*) Derive Lagrange's equation of first kind.

### Unit-IV

4. (*a*) Prove that the Poisson identity

   $$[u, (v, w)] + [v, (w, u)] + [w, (u, v)] = 0$$

   (*b*) Find the shortest line on the surface of the sphere.

   (*c*) Derive Euler's equation for one dependent variable.

### Unit-V

5. (*a*) Find the attraction of a uniform circular disc, of radius $a$ and small thickness $k$, at a point $p$ on the axis of the disc at a distance $p$ from its centre.

---

**DRG_67_**(3)  *(Continued)*

**( 3 )**

(*b*) Find the potential of a thin uniform spherical shell at any point.

(*c*) Show that a family of right circular cones with common axis and vertex is a possible family of equipotential surfaces and find the potential function.

———

**DRG_67_**(3) **580**
